

2019 Smerdon/Reeves Lecture

Residence Inn • Pullman, WA

April 4, 2019

Come hear six exciting experts in the areas of DNA repair and chromatin speak about compelling new developments in this area of basic cancer research

AGENDA

- 10:00 am Michael Smerdon, Reg. Prof., WSU-Pullman
Odyssey of a Biophysicist: Exploring DNA Repair in Chromatin
- 10:30 am Peng Mao, Res. Assoc. Prof., WSU-Pullman
Genome-wide Analysis of Base Excision Repair
- 11:00 am Kyle Miller, Assoc. Prof., Univ. of TX-Austin
Genome Integrity and DNA Damage Up Proteins

12:00 PM KEYNOTE SPEAKER

Yesenia Rodriguez

IRTA Fellow, National Institute of Environmental Health Sciences

Regulation of AP Endonuclease 1 Activity by Intrinsic and Extrinsic Features of the Nucleosome Core

- 1:15 pm Lunch Break
- 2:00 pm Jiyue Zhu, Professor, WSU-Spokane
Humanizing Telomerase Regulation in Mice
- 2:30 pm Alexander Brown, PD & Adj. Prof., WSU-Vancouver
Chromatin Drives Mutation Signatures in Melanoma
- 3:00 pm Discussion & Social
- 4:00pm Finish
